

Shuffling Numbers

Name: _____

Date: _____

Learning intention: Solve problems involving counting, adding, subtracting, doubling or halving in the context of numbers, measures or money.

Make these number cards. Shuffle the cards and work out the total each time.

2

4

3

5

Shuffle 1

$$\square + \square + \square + \square = \square$$

Shuffle 2

$$\square + \square + \square + \square = \square$$

Shuffle 3

$$\square + \square + \square + \square = \square$$

Shuffle 4

$$\square + \square + \square + \square = \square$$

Does the total change each time or does it stay the same?

Can you explain your answer?
